

Reading:

Class Text: We will start by reading There's a Boy in the Girls' Bathroom and then voting on our next class text for enjoyment.

In guided reading we will be looking at longer extracts from Holes by Louis Sachar as well as The 1000 Year Old Boy. We will look at all reading skills and examine different question styles as well as familiarising ourselves with SAT's style questions and improving our fluency.

Writing:

We'll be examining the book The Graveyard Book and looking at refining our grammar and writing skills through this/ We will learn new grammatical terms and extend our knowledge of active and passive voice as well as using punctuation effectively.

This term we will be completing more extended writing opportunities in our English lessons, notably our "Writing for Enjoyment" sessions!

Science:

Diet, Drugs and Lifestyle

Looking at the healthy diet and the five key food groups and the function of how each group helps us to stay healthy. We will consider what a drug is and how exercise can help improve our bodies.

Circulatory System

Understanding the nature of blood and does blood flow through the system. How the heart works.

Computing:

Spreadsheets: We will be using Microsoft Excel to organise, present and manipulate data in spreadsheets and also as graphs. We will present, format and analyse data as well as solving mathematical problems, including using formulae.

Blogging: We will be learning how to write a successful blog and the benefits of blogging. We will understand the importance of blogs being approved by an adult.

Maths:

We've done some great work consolidating and building on previous learning during Autumn term. We've spent a long time reinforcing the arithmetic skills. Now we're going to work on applying them, to reasoning questions.

Number and place value: Recognition of whole numbers up to 6 digits including decimals. Comparing positive and negative integers. Missing number questions. Recognising odd/even/square/triangular and prime numbers. We will also introduce Algebra, using formulae.

Calculations: Consolidating skills of long multiplication and division. Calculate efficiently using decimals. Solving missing number problems

Fractions, Decimals and Percentages: equivalent fractions, changing fractions and decimals into percentages. Finding percentages of a number. We will start to look at the concept of ratio.

Measurement: Convert between g/kg, mm/cm/m/km. compare metric and imperial units.

RE: We will look at how people of different faiths understand the concept of God. Focussing on how Muslims understand God.

Year 6

Spring Term 2025
